USER PERSONA

Explorer

Your average 1st and 2nd-year undergraduate engineering student who has finally succumbed to peer pressure and started CP. The questions you solve and the contests you give are all weapons in your programming arsenal. Get comfortable with logic-centric problems of the rating range 800 to 1000 before attempting more challenging questions and starting DSA. Do solve and compete more, but most importantly, enjoy the high of each code cracked. Cheers to an exciting journey ahead!

Seeker

You have mastered your basics. The many questions and contests you attempted are a testament to your dedication. However, you cannot unlock your true potential and worry that you have stagnated somewhere. Fear not! For there is nothing a little bit of effort can not solve. Equip yourself with more algorithms and advanced problems. You are guaranteed a surge in your rating.

Strategist

You are bright and have already achieved a respectable rating. However, you have lost steam in the last couple of months. Learn more algorithms and solve new questions to rekindle your interest in CP. You have what it takes to do even better.

Contest Regular

If your goal was to ace the coding test, congratulations, you have already achieved it. Intern and placement seasons will be a breeze for you. However, it appears you have saturated. If you are interested in CP and wish to continue it, take some time off. After the break, return and attack the problems with a rejuvenated mind.

Visionary

You are a natural warrior on the battlefield of CP. You have great logic and a knack for problem-solving. Continue doing whatever you do, and you will be unstoppable.

Achiever

You are codeforces perfection. At this point, you seem to be doing this just for fun. Keep it up!

Mastermind

You are at the top of the game when it comes to Codeforces. You can continue pursuing CP as a hobby, but it is time you try something new.
